FACUNDO FACCIOLI

Web Developer

Web developer specialized in front-end, passionate about programming and continuous learning. I create dynamic, interactive, and responsive web applications using JavaScript, TypeScript, React, Next.js, among other technologies. I have knowledge in both front-end and back-end. Currently, I am looking for new challenges that allow me to continue improving as a developer and as a person.

PROFESSIONAL EXPERIENCE

Web Developer

Nexo Soluciones / October 2022 - Present

- Front-end developer on the Cinexo team, utilizing Scrum as our working methodology.
- Contributing to the development of multi-tenant web applications using React and Next.js.
- Collaborating on the creation and refinement of User Stories.
- Developing and implementing a Production Deployment Protocol.
- Using CSS libraries such as Tailwindcss and Material UI for development.
- Utilizing Redux and Zustand for managing global states across different projects, ensuring optimal web application performance.
- Implementing payment gateways such as Mercado Pago, Cybersource, and Sitef.
- Deploying applications using Google Cloud Run.
- Collaborating with the Back-end team on the implementation of services consumed within the web applications.

Freelance Web Developer

CYFAN Descartables / December 2023 - Present

- Developed a web application for client management, receipt creation, and printing.
- Applied UX/UI principles to create a simple and functional interface.
- Technologies used: Next.ts, Next-Auth, MongoDB/Mongoose, Tailwindcss, and DaisyUI.
- Deployed the application on Vercel.
- Maintained the application's proper functionality through constant monitoring and updates.
- Integrated improvements based on client requirements.
